

NeoTool Earns Certified Partner Status in Microsoft Partner Program *NeoTool Continues to Demonstrate Leadership in the Healthcare IT Market*

Plano, TX July 24, 2007 – NeoTool, a leader in healthcare interfacing solutions, today announced it has once again earned Certified Partner status in the Microsoft® Partner Program. As a Certified Partner, Microsoft recognizes NeoTool's expertise and impact in the healthcare software marketplace and proven ability to meet customer needs.

NeoIntegrate, NeoTool's robust healthcare interface engine, successfully completed product testing as a Windows Server 2003 and Windows XP Professional application. This test ensures that NeoIntegrate provides steadfast service to users. The testing also helped fulfill the ISV/Software Solutions Competency and NeoIntegrate will be listed in the Microsoft Windows Server Catalog. Testing was conducted independently by VeriTest®, a testing service of Lionbridge Technologies.

Microsoft Competencies are designed to help differentiate a partner's capabilities with specific Microsoft technologies to customers looking for a particular type of solution. Each competency has a unique set of requirements and benefits, formulated to accurately represent the specific skills and services that partners bring to the technology industry. The ISV/Software Solutions Competency is designed for Microsoft Certified Partners that have proven their competency in deploying and marketing packaged software applications based on Microsoft technologies.

"We are extremely pleased to have again earned Certified Partner status in the Microsoft Partner Program. Only companies that have demonstrated high levels of customer service and verified their Microsoft expertise receive the designation of Microsoft Certified Partner," said Dave Shaver, NeoTool CTO and Founder.

The Microsoft Partner Program was launched in December 2003 and represents Microsoft's ongoing commitment to the success of partners worldwide. The Microsoft Partner Program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact partners have in the technology marketplace, and delivers more value to help partners' businesses be successful. Microsoft Certified Partners receive a rich set of benefits, including access, training and support that give them a competitive advantage in the marketplace.

About NeoTool:

NeoTool's healthcare integration solutions empower organizations to develop, test, deploy, and manage data exchanges between healthcare applications and providers. Through software, [HL7 training](#), and consulting, NeoTool is dedicated solely to healthcare application interfacing. NeoTool customers include healthcare providers (e.g., hospitals, imaging centers, labs, and clinics), healthcare software application providers, and medical device manufacturers. www.neotool.com
